Unified Communication Products

Nextiva's cloud-based business communication products provide small and mid-sized companies the ability to gain a competitive advantage, transform their business, and increase their profitability.

Nextiva Cloud Phone System

All inclusive, cloud-based unified communications system connects businesses with their customers, employees and partners - anywhere, anytime with our advanced mobility and collaboration tools.

Nextiva Hosted Call Center

Advanced call queuing, routing and monitoring ensures that customers receive the fastest response from agents and departments that can best help them.

Nextiva SIP Trunking

Companies can easily connect to our SIP Trunking service using their existing PBX equipment and save thousands on infrastructure and maintenance costs.

Cloud Advantages

- Reduced TCO
- Increased productivity
- Easy to implement and use
- Improved profitability
- No technical resources required
- Enables better customer experience
- Manage from anywhere
- Real-time monitoring & reporting

Amazing Service®

Nextiva products and services are supported by more than superior technology. We provide the help you and your customers need every step of the way. We call it Amazing Service. And we hope it extends to their customers so they can build lasting relationships and keep them coming back.
