Installation

Desk Setup

**NOTE:** If you place the display face down when you attach the stand, be sure to place a soft cloth under the display to avoid any damage.

1. Insert the catches **(A)** of the stand into hooks located in the unit.
2. Gently push the stand in the direction indicated until it locks in place. The stand will be mounted in the high position by default.

![Figure 1-1: Attach the Stand](image)

Adjusting from High to Low Position *(Figure 1-2)*

![Figure 1-2: Position Adjustment 1](image)
1. Tilt the stand in the direction indicated while pushing the PUSH mark with both hands as shown in Figure 1-3 until it locks into the low position (B).

Adjusting from Low to High Position (Figure 1-4)
1. Tilt the stand in the direction indicated while pushing the PUSH mark with both hands as shown in Figure 1-5 until it locks in the high position (A).

Connections for AC Adaptor/LAN/PC (Figure 1-6)

- Use the following AC Adaptor: DSA-42D-48 2 480063
- When connecting a headset, the cord used to connect devices to the EHS jack or headset jack must be less than 3 meters (9.8 ft.) in length.
- Only 1 USB headset can be connected to the unit at a time.
When connecting the Ethernet cable, connect the cables as shown in Figure 1-7.

- Incorrect
- Correct

Figure 1-7: Proper Ethernet Connectivity

Connecting the Handset *(Figure 1-8)*

![Handset Connection Diagram](image)

Figure 1-8: Handset Connection

**Wall Mounting**

**NOTE:** Make sure that the wall that the phone will be attached to is strong enough to support the phone. If not, it is necessary for the wall to be reinforced. If you place the display face down when you attach the stand, be sure to place a soft cloth under the display to avoid any damage.
1. Insert the five tabs of the wall-mounting adaptor into the designated openings in the base, and then slide the wall-mounting adaptor in the direction of the arrow until it clicks (Figure 1-12).

![Figure 1-12: Attach wall mount](image)

2. Fasten the wall-mounting adaptor to the base with 1 screw.
3. Connect the cables to the unit, and run the cables through the wall-mounting adaptor, as shown in Figure 1-13.

**NOTE:** The cables can also be run from the bottom of the unit.

![Figure 1-13: Run cables through wall mount](image)
4. Drive the two screws into the wall 83 mm (3 and 1/4 in) or 100 mm (3 and 15/16 in) apart, and mount the phone on the wall.

![Figure 1-13: Hang on wall](image)

**Locking the Handset Hook when the Phone is Wall Mounted**

1. Remove the handset hook from the slot (*Figure 1-14*).

![Figure 1-14: Remove handset hook](image)
2. Turn it upside-down (*Figure 1-15*).

![Figure 1-15: Flip hook upside-down](image)

3. Slide the handset hook into the slot until it locks (*Figure 1-16*).

![Figure 1-16: Re-insert handset hook](image)

4. The handset will be safely hooked when it is in the cradle (*Figure 1-17*).

Provisioning Instructions

Assigning the Phone to a User using the NextOS 3.0 Beta Portal

1. For Administrators, log in to the NextOS 3.0 Beta portal by visiting www.nextiva.com and clicking on the customer Login link found at the top right.
2. Log in to the NextOS 3.0 portal on the right side of the screen with your login credentials.
3. From the main dashboard, click Add in the Devices tile (Figure 3-1).

![Figure 3-1: Add Device](image)

4. If the Panasonic KX-UTG 200B was purchased from Nextiva, select Nextiva device at the top of the screen, and then select the model and MAC address of the phone in the corresponding drop-down lists. If you did not purchase the phone from Nextiva, select Own device at the top of the screen (Figure 3-2).

![Figure 3-2: Select Own Device](image)
5. Select **Panasonic KX-UTG 200B** as the model from the Select model drop-down list (*Figure 3-3*).

![Figure 3-3: Select Model](image)

6. Enter the MAC address found on the base unit in the MAC Address text box (*Figure 3-4*).

![Figure 3-4: Enter MAC Address](image)
7. Click the blue **Assign** button (*Figure 3-5*).

![Figure 3-5: Assign Device](image)

8. A pop-up message appears confirming the device was successfully provisioned. Click the X in the upper-right corner of the pop-up message to close it (*Figure 3-6*).

![Figure 3-6: Confirmation Message](image)

Now you will need to assign the Panasonic KX-UTG 200B to a user.
9. Select the user from the drop-down list to whom you want to assign the Panasonic KX-UTG 200B device *(Figure 3-7)*.

![Select the User](image1)

*Figure 3-7: Select the User*

10. Click the green **Generate** button under the **Authentication Name** text box to generate an authentication name *(Figure 3-8)*.

![Generate Authentication Name](image2)

*Figure 3-8: Generate Authentication Name*
11. Select **Change Password**, and then click the green **Generate** button to generate a new password (*Figure 3-9*).

![Figure 3-9: Generate a Password](image)

12. Click the green **Finish** button at the bottom of the screen. A pop-up message appears saying the user was successfully assigned to the device. Click the **X** in the upper-right corner of the pop-up message to close it (*Figure 3-10*).

![Figure 3-10: Confirmation Message](image)
Checking the Firmware

The Panasonic KX-UTG 200B should be on Firmware 03.137. The steps below detail how to upgrade the firmware if necessary.

1. Enable the Web Configuration Utility and obtain the IP address of the phone. To do this, select the Menu softkey, and then select Settings and press #534 on the keypad to enable embedded web. Next, select the Menu softkey again, and then select Settings and locate Information Display to locate your phone’s IP Address.

2. Enter the IP address of the phone into the address bar of a web browser (Internet Explorer, Firefox, Chrome, etc.) (Figure 3-11).

3. Login with admin for the username and adminpass for the password (Figure 3-12).
After logging in, the current firmware displays on the screen. First, determine which Bank the Panasonic KX-UTG 200B phone is using by viewing the **Operating Bank** field. Then, determine what firmware that Bank contains – it should be **03.137 (Figure 3-13)**.

![Version Information](image)

Figure 3-13: Check the Firmware

If the firmware is not correct, follow the instructions below to upgrade the firmware.

1. Click the **Maintenance** tab at the top of the screen (**Figure 3-14**).
2. Click **Firmware Maintenance** on the left side of the screen (*Figure 3-15*).

![Figure 3-15: Firmware Maintenance](image)

3. Make sure that **Enable Firmware Update** is set to **Yes**, and then enter
   
   http://dm.nextiva.com:80/dms/Nextiva_Service_Provider/KXUTG200B/firmware3.137.bin
   
   in the **Firmware File URL** text box (*Figure 3-16*).

![Figure 3-16: Enter Firmware URL](image)
4. Click **Save** at the bottom of the screen *(Figure 3-17).*

![Firmware Maintenance](image)

**Figure 3-17: Save Changes**

**Entering the Provisioning Server**

1. Enable the Web Configuration Utility and obtain the IP address of the phone. To do this, select the **Menu** softkey, and then select **Settings** and press **#534** on the keypad to enable embedded web. Next, select the **Menu** softkey again, and then select **Settings** and locate **Information Display** to locate your phone’s IP Address.

2. Enter the IP address of the phone into the address bar of a **web browser** (Internet Explorer, Firefox, Chrome, etc.) *(Figure 3-18).*

![Navigate to the Phone’s IP Address](image)

**Figure 3-18: Navigate to the Phone’s IP Address**
3. Login with **admin** for the username and **adminpass** for the password (*Figure 3-19*).

![Figure 3-19: Log In to Phone Interface](image)

4. Click the **Maintenance** tab at the top of the screen (*Figure 3-20*).

![Figure 3-20: Maintenance Tab](image)
5. Click **Provisioning Maintenance** on the left side of the screen (*Figure 3-21*).

![Figure 3-21: Provisioning Maintenance]

6. Make sure that **Enable Provisioning** is set to **Yes**, and then enter

http://dm.nextiva.com:80/dms/Nextiva_Service_Provider/KXUTG200B/ in the **Provision Server** text box (*Figure 3-22*).

![Figure 3-22: Provisioning Information]
7. Click **Save** at the bottom of the screen. After a few minutes, the phone will provision and register, which is necessary to make and receive calls *(Figure 3-23)*.

![Save Changes](image)

**Figure 3-23: Save Changes**

### Enabling the Web Configuration Utility

1. Press the **HOME** button on the bottom of the phone.
2. Select the **Settings** icon toward the bottom of the screen *(Figure 3-24)*.

![Settings](image)

**Figure 3-24: Settings**
3. Using the silver navigation pad at the bottom of the phone, scroll down to the **Network Settings** option *(Figure 3-25)*.

![Network Settings](image)

*Figure 3-25: Network Settings*

4. Press the **Enter** softkey, or press the **ENTER** button in the middle of the silver navigation pad.
5. Using the silver navigation pad, scroll down to the **Embedded Web** option.
6. Select the **On** softkey, or press the **ENTER** button in the middle of the silver navigation pad. Embedded Web will now display as **On** *(Figure 3-26)*.

![Embedded Web](image)

*Figure 3-26: Set Embedded Web to On*

7. Press the **Back** softkey to go back to the main **Settings** menu.
8. Using the silver navigation pad, scroll up to the **Information Display** option (*Figure 3-27*).

![Figure 3-27: Information Display](image)

9. Press the **Enter** softkey, or press the **ENTER** button in the middle of the silver navigation pad to open the screen containing the phone’s IP address (*Figure 3-28*).

![Figure 3-28: IP Address](image)
Additional Setup Options

Correcting the Time

**NOTE:** Make sure the time zone in the NextOS 3.0 portal is correct for the user before proceeding.

The Panasonic KX-UTG 200B cannot have its time changed on the local phone. Please call Nextiva Support to ensure your phone’s configuration file reflects the proper time zone.

Line Mirroring

The Panasonic KX-UTG 200B automatically integrates this feature into its software. Additional inbound calls will automatically rollover to the next available line.

Busy Lamp Field (BLF)

Busy Lamp Field (BLF) is a service that allows a user to see/monitor (from their phone) whether another user is on the phone or not. This feature is commonly used by administrative assistants for ease of call transfer, and by call center managers to assist in monitoring their employees. If you would like to set up BLF on your phone, please contact Nextiva Support.

Directories

Remote directories are not supported on the Panasonic KX-UTG 200B.

Speed Dials

**From the Phone**

1. Dial *75 from the phone.
2. After the phone beeps, enter the two-digit number to be used for the speed dial, and then the phone number or extension, followed by #.

   **EXAMPLE:** To set up the number 02 as a speed dial to 4805551234, enter 02, then 4805551234, then # (024805551234#).

3. Hang up.

To use speed dials, go off-hook with your phone. Enter #, followed by the speed dial number (ex. #02) to connect to the assigned phone number. If the speed dial number is lower than 10, you must enter the 0 preceding the number to create a two-digit number. If you are using a softphone, dial #, followed by the speed dial number, and then press the dial button.
NOTE: In this guide off-hook is used to describe when a phone is in use or has a dial tone before a call is made. On-hook describes when a phone is idle.

From the Web Configuration Utility

1. Enable the Web Configuration Utility and obtain the IP address of the phone (see instructions in ‘Enabling the Web Configuration Utility’ section).
2. Enter the IP address of the phone into the address bar of a web browser (Internet Explorer, Firefox, Chrome, etc.) (Figure 4-1).

2. Login with admin for the username and adminpass for the password (Figure 4-2).
3. Click the **Telephone** tab at the top of the screen *(Figure 4-3)*.

![Figure 4-3: Telephone Tab](image)

4. Click **Flexible Button Settings** on the left side of the screen *(Figure 4-4)*.

![Figure 4-4: Flexible Button Settings](image)
5. Fill in the fields as indicated below (Figure 4-5).
   - **Type:** One-Touch
   - **Line:** Line 1
   - **Parameter:** the phone number or extension
   - **Label Name:** the name that will appear on the phone screen

![Flexible Button Settings](image)

**Figure 4-5: Set Speed Dials**

**From the NextOS 3.0 Beta Portal**

1. For Administrators, log in to the NextOS 3.0 Beta portal by visiting [www.nextiva.com](http://www.nextiva.com) and clicking on the customer Login found at the top right.
2. Log in to the NextOS 3.0 Beta portal with your login credentials.
3. From the main dashboard, click **Manage** in the **Users** tile (*Figure 4-6*).

![Figure 4-6: Manage Users](image)

4. Hover your cursor over the user you want to set up speed dials for, and click the **pencil icon** to the right (*Figure 4-7*).

![Figure 4-7: Edit User](image)
5. Scroll down and select the **Routing** section (*Figure 4-8*).

![](image1.png)

*Figure 4-8: Routing Section*

6. Click the **pencil icon** to the right of Speed dial (*Figure 4-9*).

![](image2.png)

*Figure 4-9: Speed Dial*
7. Click the **plus sign** at the bottom-right (*Figure 4-10*).

8. Select the speed dial number from the **Option** drop-down list (*Figure 4-11*).
9. Enter a descriptive name for the speed dial in the **Name** text box, and then enter the phone number or extension in the **Phone Number** text box. Please note that special characters or spaces are not supported for the speed dial descriptive name *(Figure 4-12)*.

![Figure 4-12: Configure Speed Dial](image)

10. Click the green **Save** button at the bottom-right of the Speed dial menu. A pop-up message appears stating that the speed dial 100 settings have been saved successfully *(Figure 4-13)*.

![Figure 4-13: Confirmation Message](image)
To use speed dials, go **off-hook** with your phone. Enter #, followed by the speed dial number (ex. #02) to connect to the assigned phone number. If the speed dial number is lower than 10, you must enter the 0 preceding the number to create a two-digit number. If you are using a softphone, dial #, followed by the speed dial number, and then press the dial button.

**Automatic Call Distribution (ACD)**

The Panasonic KX-UTG 200B supports phone integration with Nextiva Call Center Pro and Nextiva Call Center Enterprise’s ACD states, allowing agents to go available and sign out of a call center from their phone’s interface. To set up this feature, contact Nextiva Support.
Basic Phone Usage

Making a Call

**NOTE:** In this guide *off-hook* is used to describe when a phone is in use, or has a dial tone before a call is made. *On-hook* describes when a phone is idle.

1. Go *off-hook*, or press the **SP-PHONE** or **HEADSET** button.

**NOTE:** You can also initiate a call by pressing the **New Call** softkey at the bottom of the screen while the phone is idle (not in use). After doing so, you hear a dial tone through the speakerphone (*Figure 5-1*).

*Figure 5-1: New Call*
2. Dial the phone number or extension of the party you want to call, and then press the **Send** softkey at the bottom of the screen *(Figure 5-2)*.

**NOTE:** If you dial the full 10-digit number of the party you want to call, the Panasonic KX-UTG 200B will automatically start dialing so pressing the Send softkey is not necessary.

![Figure 5-2: Send Softkey](image)

3. When finished, go **on-hook**, or press the **SP-PHONE** or **HEADSET** button to disconnect the call.

**NOTE:** You can also disconnect the call by pressing the **End Call** softkey at the bottom of the screen *(Figure 5-3)*.

![Figure 5-3: End Call Softkey](image)
Making a Second Call

1. While on a call, press the **HOLD** button to put the party you are speaking to on hold.
2. Press the **New Call** softkey at the bottom of the screen. *(Figure 5-4)*

![Figure 5-4: New Call](image)

3. Dial the phone number or extension of the party you want to call, and then press the **Send** softkey at the bottom of the screen. After you are connected to the second party, both calls will appear on the screen, with the active call highlighted in blue *(Figure 5-5)*.

**NOTE:** If you dial the full 10-digit number of the party you want to call, the Panasonic KX-UTG 200B will automatically start dialing so pressing the Send softkey is not necessary.

![Figure 5-5: Second Phone Call](image)
4. To go back to the first party, press the line key of the corresponding entry on the screen. The second party is automatically put on hold, and you will be speaking to the first party again (Figure 5-6).

![Figure 5-6: Selecting Active Calls](image)

5. To end the call with either party, press the **End Call** softkey at the bottom of the screen while on that active call (Figure 5-7).

![Figure 5-7: End Call](image)
NOTE: Disconnecting with one party does not automatically take the other party off hold. To speak to the other party, press the Resume softkey at the bottom of the screen (Figure 5-8).

![Resume Call](image1)

**Figure 5-8: Resume Call**

**Accepting a Call**

1. While the phone is ringing, go off-hook, or press the SP-PHONE or HEADSET button.

   **NOTE:** You can also press the Answer softkey at the bottom of the screen to answer a call. Doing so automatically answers using the speakerphone (Figure 5-9).

![Answer Call](image2)

**Figure 5-9: Answer Call**
To change this default behavior so the phone automatically answers using the headset, press the HEADSET button while the phone is ringing. A headset icon appears in the upper-left corner of the screen. Pressing the Answer softkey in the future automatically answers using the headset (Figure 5-10).

![Figure 5-10: Headset Mode](image)

**NOTE:** Pressing the SP-PHONE button to switch to speakerphone takes you out of headset mode and puts you into speakerphone mode. After this, pressing the Answer softkey automatically answers using the speakerphone.

**Accepting a Second Call**

1. When you hear the call waiting tone through the handset, speakerphone, or headset, press the Answer softkey at the bottom of the screen. The first party is put on hold, and you are speaking to the second party (Figure 5-11).

![Figure 5-11: Answering a Second Call](image)
2. To go back to the first party, press the corresponding line key on the right side of the screen. The second party is automatically put on hold, and you will be speaking to the first party again (Figure 5-12).

![Figure 5-12: Selecting Active Calls](image1)

3. To end the call with either party, press the **End Call** softkey at the bottom of the screen while on that active call (Figure 5-13).

![Figure 5-13: End Call](image2)
NOTE: Disconnecting with one party does not automatically take the other party off hold. To speak to the other party, press the Resume softkey at the bottom of the screen (Figure 5-14).

![Resume Call Image](image)

Figure 5-14: Resume Call

**Terminating a Call**

You can disconnect a call at any time by pressing the End Call softkey at the bottom of the screen. Alternatively, if using the handset, speakerphone or a headset, you can disconnect the call by going on-hook or pressing the SP-PHONE or HEADSET button, respectively.

**Transferring a Call**

There are two types of transfers – a warm transfer (attended) and a blind transfer (unattended). A warm transfer occurs when you speak to the party you are transferring the call to before you transfer the call to them. With a blind transfer you do not speak to the receiving party before transferring the call to them.

**Warm Transferring**

1. While on a call, press the TRANSFER button on the bottom-right of the phone. The party you were speaking with is put on hold, and you will hear a dial tone.
2. Dial the phone number or extension of the party you want to transfer the call to, and then press the Send softkey at the bottom of the screen. Wait for the other party to answer so you can speak to them before transferring the call.
**NOTE:** If you dial the full 10-digit number of the party you want to call, the Panasonic KX-UTG 200B will automatically start dialing so pressing the Send softkey is not necessary. To cancel the transfer and return to the first party, press the **Cancel** softkey at the bottom of the screen, and then press the **Resume** softkey to resume the call with the first party (*Figure 5-15*).

![Figure 5-15: Cancel Transfer](image)

3. When the other party is ready to accept the call, press the **TRANSFER** button again. The first party, which was on hold, is transferred to the second party.

**Blind Transferring**

1. While on a call, press the **Blind** softkey at the bottom of the screen (*Figure 5-16*).

![Figure 5-16: Blind Transfer](image)
2. Dial the phone number or extension of the party you want to transfer the call to, and then press the **Send** softkey at the bottom of the screen.

**NOTE:** If you dial the full 10-digit number of the party you want to call, the Panasonic KX-UTG 200B will automatically start dialing so pressing the Send softkey is not necessary.

![Figure 5-17: Send Transfer](image)

**NOTE:** To cancel the transfer and return to the first party, press the **Cancel** softkey at the bottom of the screen, and then press the **Resume** softkey to resume the call with the first party (*Figure 5-18)*.

![Figure 5-18: Cancel Blind Transfer](image)
Conferencing

1. While on a call, press the CONFERENCE button on the bottom of the phone.
2. Dial the phone number or extension of the party you want to add to the conversation, and then press the Send softkey. Wait for the other party to answer so you can speak to them before conferencing in the original party. You cannot conference in the first party until the second party answers.

**NOTE:** If you dial the full 10-digit number of the party you want to call, the Panasonic KX-UTG 200B will automatically start dialing so pressing the Send softkey is not necessary (Figure 5-19).

![Figure 5-19: Conferencing](image)

**NOTE:** To cancel the conference and return to the first party, press the Cancel softkey at the bottom of the screen. Next, press the Resume softkey to resume the call with the first party (Figure 5-20).

![Figure 5-20: Cancel Conference](image)
3. After the second party answers and you are ready to begin the conference call, press the **CONFERENCE** button again to add the original party to the conversation. You are then speaking with both parties at once.

4. To add a third party to the conference, repeat steps 1 through 3 above.

### Checking Voicemail

When you have a new voicemail message, the Panasonic KX-UTG 200B phone displays an **envelope** on the screen and the message waiting indicator light on the upper-right of the phone turns **solid red**. You will also hear a stutter when you go off-hook or press the SP-PHONE or HEADSET button.

**NOTE:** The phone does not display the number of voicemail messages you have. The number that appears to the right of the envelope is the number of missed calls, which may or may not be the same as the number of voicemail messages you have.

1. Press the **MESSAGE** button on the left side of the phone. It does not matter whether you go off-hook before or after pressing the MESSAGE button.
2. Enter your password when prompted. The default password is **0000#**.
3. If this is your first time checking your voicemail, follow the prompts to change your password and record your name.
4. Press **1** to access your voice mailbox.
5. Press **1** to listen to your messages.
6. When finished listening to your voicemails, press the **End Call** softkey at the bottom of the screen to terminate the call or proceed to the instructions below.
By default, if you do not answer your phone after 3 rings the call is forwarded to voicemail, and callers hear your recorded name followed by a message saying “is not available to take your call. Please leave a message after the beep.” If desired, you can set up a longer, more personal greeting after the initial voicemail setup is complete.

**Recording a Custom No Answer Greeting**

To set up a custom No Answer greeting, which is the default greeting that plays if you do not answer your phone after 3 rings, follow the instructions below.

1. Press the **MESSAGE** button on the left side of the phone. It does not matter whether you go off-hook before or after pressing the MESSAGE button.
2. Enter your password when prompted.
3. Press **1** to access your voice mailbox.
4. Press **3** to record a No Answer greeting.
5. Press **1** to record a new No Answer greeting, and press **#** when you are done speaking.

You will hear additional menu options after you press **#** to listen and rerecord the new greeting if necessary. Once you are satisfied with your new greeting, the greeting will be updated and implemented for your voicemail.

**Directories**

Remote directories are not supported on the Panasonic KX-UTG 200B.

**Call Lists**

**NOTE:** Call lists will survive a reboot, but not a factory reset.

1. Press the **Call Log** softkey at the bottom of the screen.

![Figure 5-22: Call Log](image)
2. Select the type of calls you want to see. Alternatively, you can select All Calls to see a list of all calls. In the example below, Received Calls is selected to see a list of the calls that have been received (Figure 5-23).

![Figure 5-23: Call Log Options](image)

3. To make a call out to an entry in the list, press the Call softkey at the bottom of the screen.

![Figure 5-24: Call from List](image)
4. To clear the list of calls, press the **More** softkey at the bottom of the screen, and then press the **Clear List** softkey at the bottom of the screen.

![Figure 5-25: Clear List](image)

5. After pressing the **Clear list** softkey, confirm you want to clear the list of calls by pressing **Yes** at the bottom of the screen (**Figure 5-26**).

![Figure 5-26: Clear List](image)
Missed Calls

When there is a missed call, a red missed call icon appears next to the user’s name in the upper-left corner of the display screen, with the number of missed calls below that (Figure 5-27).

Transferring to a Party on your Call List

1. While on a call, press the TRANSFER button on the bottom-right of the phone. The party you were speaking to is put on hold, and you hear a dial tone.
2. Press the Call Log softkey at the bottom of the screen (Figure 5-28).
3. Select the type of calls you want to see. Alternatively, you can select All Calls to see a list of all calls. In the example below, Received Calls is selected to see a list of the calls that have been missed (Figure 5-29).

![Figure 5-29: Select the Specific List](image)

4. To make a call out to an entry in the list you want to transfer the call to, press the Call softkey at the bottom of the screen (Figure 5-30).

![Figure 5-30: Call the Entry](image)

5. When the other party is ready to accept the call, press the TRANSFER button again. The first party, which was on hold, is transferred to the second party.
Conferencing in a Party on your Call List

1. While on a call, press the CONFERENCE button on the bottom-right of the phone.
2. Press the Call Log softkey at the bottom of the screen (Figure 5-31).

![Figure 5-31: Access the Call Log](image)

3. Select the type of calls you want to see. Alternatively, you can select All Calls to see a list of all calls. In the example below, Received Calls is selected to see a list of the calls that have been received.

![Figure 5-32: Select the Specific List](image)
4. To call an entry in the list, press the Call softkey at the bottom of the screen (Figure 5-33).

5. After the second party answers and you are ready to begin the conference call, press the CONFERENCE button again to add the original party to the conversation. You are then speaking with both parties at once.

6. To add a third party to the conference, repeat steps 1 through 5 above.

Using Speed Dials

1. Go off-hook or press the Speaker or Headset button.
2. Enter #, and then the speed dial number. Then press the Dial softkey at the bottom of the screen. After a few seconds, the call initiates.

Using the Flexible Buttons

1. Press the FlexibleBtn softkey at the bottom of the screen (Figure 5-34).
2. Press the **name** of the speed dial contact on the screen. A call is initiated to that contact (*Figure 5-35*).

Changing ACD States

In order for a call center agent to change their ACD state from a Panasonic KX-UTG 200B phone, ACD functionality needs to be enabled on the phone using custom tags. See the section above titled Automatic Call Distribution (ACD) for instructions on how to set this feature up.

Signing In

To sign in to a queue, press the **More** softkey, followed by the **ASignIn** softkey. The screen updates to show a check mark next to your name (Figure 6-1).

**NOTE:** Signing in will not route calls that are in queue to your phone. To receive calls, you need to change your ACD state to **Available**. To do this, press the **More** softkey, followed by the **Available** softkey. The screen updates to show a green check mark next to your name. Any calls that are in queue could potentially route to your phone.

![Figure 6-1: Signed in Agent](image1)

![Figure 6-2: Available Agent](image2)
Going Unavailable

Changing your ACD state to Unavailable (going unavailable) is typically done when taking a break or when you are away from your phone. Follow the instructions below to do this:

1. Press the More softkey at the bottom of the screen once, and then press the Unavailable softkey at the bottom of the screen.

   **NOTE:** You will not be able to go unavailable if you are on an active call. You will need to wait until after the call has ended to go unavailable *(Figure 6-3)*.

![Figure 6-3: Unavailable Softkey](image)

2. Enter the two-digit reason code for going unavailable, and then press the OK softkey at the bottom of the screen *(Figure 6-4)*.

   **NOTE:** Reason codes are provided to you by the administrator for your Nextiva account. If you have not been provided with any reason codes, leave the field blank and press the OK softkey without entering a value.

![Figure 6-4: Reason Code](image)
After going unavailable, the screen updates to show a **red clock** next to your name *(Figure 6-5).*

![Figure 6-5: Unavailable Agent](image)

**Going Available**

When returning to your desk from a break, meeting, etc., you need to change your ACD state to Available (go available) again. To do this, press the **More** softkey at the bottom of the screen once, and then press the **Available** softkey at the bottom of the screen to go available *(Figure 6-6).*

![Figure 6-6: Available Softkey](image)

The screen updates to show a **green check mark** next to your name.
Accepting a Call

Accepting a call is no different than when ACD functionality is not enabled.

Disposition Codes

Disposition Codes are attributes applied to a call to identify marketing promotions or other topics pertaining to a call. If the administrator for your Nextiva account has enabled disposition codes on your call center, you can apply a disposition code to a call while the call is still in progress. Follow the instructions below to do this:

1. While on a call, press the More softkey twice, followed by the DispCode softkey (Figure 6-7).

2. Enter the disposition code given to you by the administrator of your Nextiva account, and then press the OK softkey at the bottom of the screen (Figure 6-8).
Wrap-Up

Wrap-Up refers to the time after a call ends but before another call is routed to your phone. This is an optional state that can be enabled or not enabled for your call center. If the administrator for your Nextiva account has enabled Wrap-Up on the call center, then immediately after the last active call ends on your Panasonic KX-UTG 200B phone, the icon to the right of your name changes to reflect the new Wrap-Up status (Figure 6-9).

![Figure 6-9: Wrapping up Agent](image)

From here, you can either wait for the default wrap-up time to expire (typically 30 seconds), or you can press the More softkey at the bottom of the screen once, and then press the Available softkey at the bottom of the screen to go available immediately.

Signing Out

When going to lunch, leaving for the day, etc., you need to sign out of your call center queues. To do this, press the More softkey at the bottom of the screen once, and then press the ASignOut softkey at the bottom of the screen to sign out. (Figure 6-10).

Additional Features

Do Not Disturb (DND)

From the Phone

1. Press the **FORWARD/DO NOT DISTURB** button on the bottom-left of the phone. The Do Not Disturb option is automatically selected.
2. Press the **On** softkey at the bottom of the screen (*Figure 7-1*).

![Figure 7-1: Turn on Do Not Disturb](image)

3. Press the **Save** softkey at the bottom of the screen (*Figure 7-2*).

![Figure 7-2: Save Changes](image)
4. Press the **Back** softkey at the bottom of the screen. The icon to the left of your name updates to show DND is enabled (*Figure 7-3*).

![Figure 7-3: Agent on Do Not Disturb](image)

5. To disable DND, repeat steps 1 through 4, selecting **Off** instead of **On**.

**Using Star Codes**

1. Go **off-hook** or press the **SP-PHONE** or **HEADSET** button.
2. Dial ***78**. You will hear an automated message saying your Do Not Disturb service has been activated successfully.
3. Press the **End Call** softkey at the bottom of the screen to disconnect the call. The phone icon next to your name updates to reflect that DND has been enabled.
4. To disable DND, repeat steps 1 through 3, dialing ***79** instead of ***78**.
Factory Reset

From the Phone’s Menu

1. Press the HOME button on the bottom of the phone.
2. Select Settings from the menu (Figure 8-1).

   ![Figure 8-1: Settings](image)

3. Scroll down and select Change Level from the menu to sign in as an administrator for the phone (Figure 8-2).

   ![Figure 8-2: Change Level](image)
4. Enter **admin** as the User ID and **adminpass** as the Password, and then press the **Enter** softkey at the bottom of the screen (*Figure 8-3*).

![Figure 8-3: Admin Login](image)

5. Scroll down and select **Reset** from the menu (*Figure 8-4*).

![Figure 8-4: Reset Option](image)
6. Select **Exclude Private Settings** from the menu (*Figure 8-5*).

![Figure 8-5: Exclude Private Settings](image)

7. Confirm you want to factory reset the phone by selecting **Yes** at the bottom of the screen. After a few seconds the phone will automatically reboot (*Figure 8-6*).

![Figure 8-6: Confirm Factory Reset](image)

**From the Web Configuration Utility**

1. Enable the Web Configuration Utility and obtain the IP address of the phone. Select the **Menu** softkey, and then select **Settings** and press **#534** on the keypad to enable embedded web. Next, select the **Menu** softkey again, and then select **Settings** and locate **Information Display** to locate your phone’s IP Address.
2. Enter the IP address of the phone into the address bar of a **web browser** (Internet Explorer, Firefox, Chrome, etc.) *(Figure 8-7).*

![Figure 8-7: Navigate to the Phone’s IP Address](image1)

3. Login with **admin** for the username and **adminpass** for the password *(Figure 8-8).*

![Figure 8-8: Log In to Phone Interface](image2)
4. Click the **Maintenance** tab at the top of the screen (*Figure 8-9*).

![Figure 8-9: Maintenance Tab](image)

5. Click **Reset & Restart** on the left side of the screen (*Figure 8-10*).

![Figure 8-10: Reset and Restart](image)
6. Click **Reset** under the **Factory Reset** heading (*Figure 8-11*).

![Figure 8-11: Factory Reset](image1)

7. Click **OK** when the pop-up message appears asking if you really want to reset the phone. After a few seconds the phone will automatically reboot.

![Figure 8-12: Confirm Factory Reset](image2)
